SAB IT DB METADATA SOFTWARE INVESTOR DECK

SAB IT DB METADATA SOFTWARE

Problem

Digitalization is challenging business structures and old ways of action irreversibly.

The supply of IT softwares covers **ERP, CRM, SCM** but the supply of the entire value chain is missing,

Companies have had to purchase a number of overlapping information systems.

The coordination of different systems have caused huge additional costs associated with upgrades and system maintenance.

Processes and their analytics are not sufficiently automated, so manual jobs create inefficiency and reduce the profitability of companies.

Customers want to know the prices and availability of products, services and solutions in real time without extra margin dividers.

There is no investment in stock, but nevertheless production wheels must be in motion to avoid losses.

Traditional vertical networks are not enough to meet the challenges of the future.

SAB IT DB METADATA SOFTWARE

Solution

Horizontal **SAB IT DB Metadata Software** offers **IoT, AI, GIS, VOICE, METADATA** including to control processes, projects, data flows, material flows, cash flows and transactions with unique Voice-System in all industry branches.

SAB IT DB is a totally revolutionary solution for data mining and analytics related business planning and implementation to optimize profits and to minimize costs.

Quality Search, Watch, Sort, Compare, Edit, Count, Visualize, Analyze, Share and Archive provide demand and supply in accordance market economy logic worldwide 24/7.

The customer can import data to **SAB IT DB METADATA SOFTWARE** from own **ERP, CRM** and **SCM** systems.

In **SAB IT DB METADATA SOFTWARE** man is able to handle Processes, Roles, Matter Connections, Locations, Functions, Graphs and Economic Indicators at the same time.

SAB IT DB METADATA SOFTWARE TECHNOLOGY

SAB IT DB` s connections are primary objects in the database and hence provide fast querying capabilities on the data.

SAB IT DB evaluates logical rules. Its capabilities include reasoning over rdf metadata using configurable and dynamically modifiable rule sets and ontologies without recalculation over large datasets.

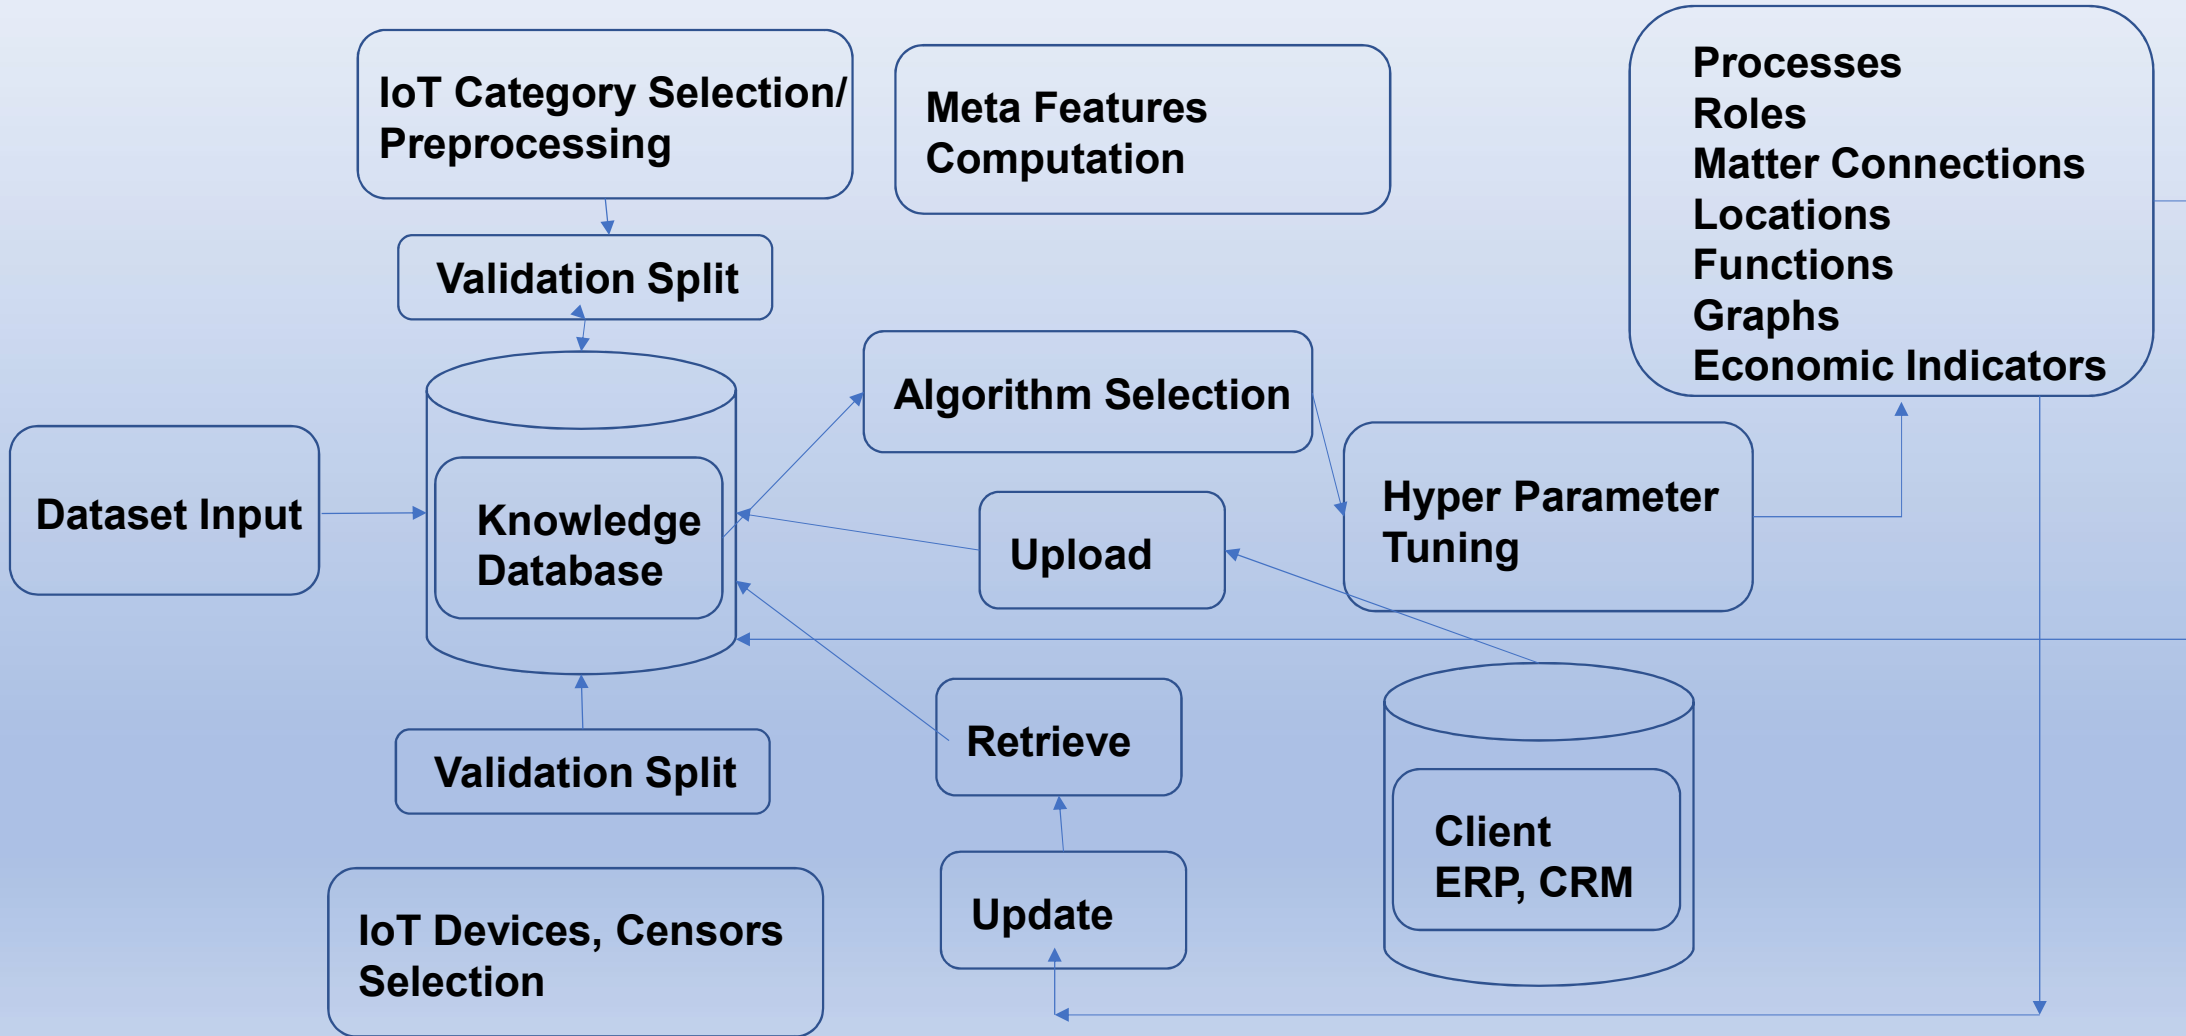

SAB IT DB supports custom rules as well as rule standards such as RDF Schema (RDFS) and Web Ontology Language (OWL). Using ontologies it is possible to enrich the metadata with for example equality expressions and cardinality restrictions.

SAB IT DB takes into account the context of search, location and the intent of queries to provide relevant search results. The technology refines data into critical information in real time.

Semantic search employ to better understand the context of a search. Is not just about simply discovering information any more, it's about ordering the web into a coherent flow of information; how topics, themes, ideas, text, video, audio is connected and related to each other.

SAB IT DB METADATA SOFTWARE

Market and Earning Logic

The information technology market has huge potential on a global scale.

Earning logic of **SAB IT DB METADATA SOFTWARE** consists of sold technology licenses.

The market potential of **SAB IT DB METADATA SOFTWARE** depend on how many percent of transactions will pass through our marketplaces, the market share and the level of transaction fees.

Underlying Magic

We have a time-honored global competitive advantage. That's why we need quick market penetration.

Competition

There are no competitors in these contexts in the world.

SAB IT DB METADATA SOFTWARE

Better/Different

We have done three years development work with our own expertise, resources and risk. We have not applied for public funding, loans or investors. The value of development work is about € four million.

Arguments for Investors/Partners

- Transition to the global industrial disruption 24/7 and digitalization are becoming a corporate megatrend globally.
- Currently no competitors in the world in these contexts.

The size of the investment

€ 50.000.000

Marketing Plan/Internationalization

The plan for internationalization will be drawn up together with the investor(s).

SAB IT DB METADATA SOFTWARE

Company

Worldwide Marketplaces Ltd. has founded in 2019 to operate global business and IPR of **SAB IT DB METADATA SOFTWARE**.

Kemp House 152-160 City Road, London, United Kingdom, EC1V 2NX
