The year is 300 years after dragons disappeared from the world. Warriors born with the fortune of having dragon blood in their veins are known as dragon hunters. Most of them are born with wings on their backs and devour the blood of cursed humans in order to fulfill their role as protectors of the dragons. The empire of which they are part is known as the Iron Alliance, and the last thing the world needs is another warlike and expansionist power. In order to keep the peace, the Iron Alliance does not officially condone the existence of the dragon hunters, nor the “witchers”, as they are known. But in reality, no dragon hunter can live in the empire without the witchers and the dragons they feed on. Proofreading Proofreading is currently done by Daniel Rios Jr.

Dammal Stroop test: a sensitive new instrument for diagnosis of progressive myoclonus epilepsy. Determination of prognosis in progressive myoclonus epilepsy (PME) may be obtained through analysis of sleep-dependent myoclonus during electroencephalography (EEG), but is difficult to perform. To overcome this difficulty, we developed a new test we call the Dammam Stroop test, in which patients are asked to repeat syllables in Arabic while performing a task with an embedded color-naming task. The test relies on the suppression of temporal myoclonus by a color-naming task. This suppressive effect is absent in patients with

myoclonus that is only sleep-dependent and in sleep-unrelated myoclonus. We applied the Dammam Stroop test to 22 patients with PME and 16 age- and sex-matched controls. The test

Imagine if you were having a bad dream, and you need to escape. Do you try waking up? No, you just continue with your bad dream.

---

Imagine you are on an island, and you need to leave. Do you try to swim, because even if you knew how to swim, a surf would still knock you right out of the water. You see, you can't escape the island, you just continue dreaming. This is our story: I'm on a boat. The boat is sinking. We are all tired of our own lives. There is no way out, and there is no way to save ourselves. It is day; it is night; and there is no light on the island. We are looking for any way to escape and to survive. The land is gone. It would be boring if the same old system is used again and again on our favorite game genre, which is indie development. I have spent a lot of time on this project. The resources that I have spent are all mine. The image it took, and the animation that have been realized, are my creation. If you enjoyed this project, please help me give support by sharing it! **- The Final Chapter Emberdoom VR is finally coming to an end, after a fantastic journey! I've wanted to post a retrospective for a long time, but with Suddendee's launch, have had to double-up on other projects. I've always felt bad about it, as a whole, Suddendee released at a time where I was kind of slacking off on games development, as well as the need for a small bit of breathing space for my overall career/personal development. I also never wanted this project to be the justification for that slacking off! Just so you know, in the last 5 years I have been a lead at an indie developer, worked with devs from multi-national companies, and was employed for a variety of game development and related roles. That's not the problem. The problem is that a lot of these things take a lot of time and effort. Deep technical skill development takes a long time to achieve and I'm only just there now. If I was an 100th percentile skill developer (haha) then I'd be ready to release today, but let's not sugar coat it. It takes years to develop a new engine and that's not in question. For me, I've been spending too much time on works in progress. That's just how life is and how things are for most professional developers. With that said, times have changed over the last few years. I've seen sales of games via Humble Bundle and XBLIG has also matured in a long time. There have been numerous successes, such as Noitu Love 2 and UltraBot MMA (both of which I had some super fun development & design on!). My personal bet is that XBLIG is near its peak as a self-publishing platform, but I could be wrong. Games like Oculus Home for example are bolstering the platform further, and DRM free games are just beginning to come to dominate. The official launch for Suddendee and Emberdoom VR has been done in many ways. Suddendee launched to the Oculus Store on May 24th and on Steam on June 5th after it crossed 100 reviews on Steam and became greenlit. Around the release date, we announced that we'd be transitioning the game to the Unreal Engine 4 and which would apply to all platforms - Steam was the next step in that journey.**

**HeadQuarters World War II is a fast paced turn-based strategy covering the Battle of Normandy in the three plot-driven campaigns and a number of skirmishes. Choose your side, form your force, assign heroes, level up your units, and use Headquarters skills to overcome the enemy. Face a real tactical challenge The game's combat system is based on an easy to learn - hard to master approach. Deceptively easy at a first glance, it offers lots of possibilities:**

- Units have front/side/back/top armor and their positioning matters a lot
- Fences and other obstacles offer a directional cover that depends on the angle of attack
- Different terrain types offer various bonuses and affect Line of Sight
- Destroyed vehicles and other large objects affect the battlefield and provide cover
- High Ground mechanics allow multiple levels of

**terrain elevation that affect Line of Sight and combat effectiveness**

- Destructible buildings with different stages of demolition create unique challenges Enjoy the striking visuals All units and scenery are created with the finest attention to detail using Unreal Engine 4 to achieve a very realistic visual style:**
- Realistic unit models with proper physics in place**
- Visceral elements of devastation - burning tank hulks, ruined houses, shell craters, smoke, death, and destruction. You will witness this and many other horrors of the war**
- Varied surroundings - your troops will come across war-torn battlefields as well as peaceful villages with cattle and fields of grain. Mind your tanks - this quaint beauty is quite fragile Go through numerous battles See all sides of the story by completing 3 campaigns with 9 operations in each.
